Science Statement of Intent

In science, children's skills are developed by a spiral curriculum that revisits previous learning, allowing children to know more and remember more. Within science, growth mindset is given a platform, providing children with the opportunity to grow their own learning by **independently** designing, carrying out and re-designing **enquiries**. Diversity is developed within Science by encouraging children to value themselves as 'scientists' and by inspiring our pupil's **aspirations** through the exploration and celebration of scientists from **diverse** backgrounds and cultures.

We aim to instil a sense of wonder and curiosity in our wonderful world through **inspirational** teaching which offers an **engaging** and **exciting** 'hands on' approach.
